Reading for Gist and Answering Text-Dependent Questions: Industrial Food Chain

This work is licensed under a Creative Commons Attribution-NonCommercial-ShareAlike 3.0 Unported License.
Exempt third-party content is indicated by the footer: © (name of copyright holder). Used by permission and not subject to Creative Commons license.

Long-Term Targets Addressed (Based on NYSP12 ELA CCLS)

I can cite text-based evidence that provides the strongest support for my analysis of literary text. (RI.8.1)

I can determine a theme or the central ideas of an informational text. (RI.8.2)

I can determine the meaning of words and phrases in text (figurative, connotative, and technical meanings). (RI.8.4)

I can use a variety of strategies to determine the meaning of unknown words or phrases. (L.8.4)

- a. I can use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., precede, recede, secede).
- b. I can consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning or its part of speech.
- c. I can verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).

Supporting Learning Targets

- I can find the gist of pages 22–25 of *The Omnivore's Dilemma*.
- I can read closely to answer questions about pages 22–25 of *The Omnivore's Dilemma*.

Ongoing Assessment

- Gist annotated on sticky notes
- New vocabulary on word-catcher
- Answers to text-dependent questions

Agenda	Teaching Notes
<ol style="list-style-type: none">1. Opening<ol style="list-style-type: none">A. Engaging the Reader: Page 5 of <i>The Omnivore's Dilemma</i> (6 minutes)B. Unpacking Learning Targets (2 minutes)2. Work Time<ol style="list-style-type: none">A. Reading for Gist and Unfamiliar Vocabulary: Pages 22–25 of <i>The Omnivore's Dilemma</i> (15 minutes)B. Text-Dependent Questions: Pages 22–25 (12 minutes)C. Introducing Food Chain Graphic Organizer (5 minutes)3. Closing and Assessment<ol style="list-style-type: none">A. Continue Filling Out Food Chain Graphic Organizer (5 minutes)4. Homework<ol style="list-style-type: none">A. Read Chapter 3 of <i>The Omnivore's Dilemma</i>. Continue filling out your Food Chain graphic organizer for the industrial food chain. Remember to record any new vocabulary on your word-catcher	<ul style="list-style-type: none">• In this lesson, students begin to study the industrial food chain suggested by Michael Pollan. They have already read most of the first two chapters for homework.• Students are introduced to a Food Chain graphic organizer that they will be using throughout the unit to organize their thinking on where the food begins in the chain and how it gets to us at the end of the chain. Model how to fill out these organizers, as students will be organizing their thinking on these at home as they read <i>The Omnivore's Dilemma</i>.• Reading for the gist and identifying unfamiliar vocabulary in Work Time A could take longer than the allocated 15 minutes depending on your students.• In advance: Read pages 22–25 (from “I Plant Corn”) considering the gist of each paragraph and the answers to the text-dependent questions students will be asked (see supporting materials).• Post: Learning targets.

Lesson Vocabulary	Materials
gist; regular, quadrupled, kernels, Pioneer Hi-Bred 34H31, agribusiness, hybrid, traits, disease-resistant, bushel, quadrupled, yields, genetically, organism, genes, DNA, bonanza, patent, corporation, reckless	<ul style="list-style-type: none">• <i>The Omnivore's Dilemma</i>, Young Readers Edition (book; one per student)• Specials Board meal charts (from Lesson 1)• Entrance Ticket: Meal and Food Chain Match (one per student)• Reading Closely: Guiding Questions handout (one for display)• Sticky notes (at least 10 per student)• Word-catcher (one per student and one for display; double sided)• Dictionaries (enough for students to be able to reference them quickly while reading)• Text-Dependent Questions: Pages 22–25 of <i>The Omnivore's Dilemma</i> (one per student)• Text-Dependent Questions: Pages 22–25 of <i>The Omnivore's Dilemma</i> (answers, for teacher reference)• Food Chain graphic organizer (one per student and one for display)

Opening	Meeting Students' Needs
<p>A. Engaging the Reader: Page 5 of <i>The Omnivore's Dilemma</i> (6 minutes)</p> <ul style="list-style-type: none"> • Be sure students have their text <i>The Omnivore's Dilemma</i>. Remind students that for homework they read pages 4–6 and 9–25. Remind the class of the four food chains that Michael Pollan introduces on page 5. • Focus students' attention on the definitions of each of the food chains, and remind them of the four meals on the Specials Board meal charts that they were introduced to at the beginning of the previous lesson. • Distribute Entrance Ticket: Meal and Food Chain Match. • Ask students to Think-Pair-Share before recording their response to the following on their entrance ticket: <ul style="list-style-type: none"> * "Each of these meals comes from a different food chain. Based on the description of each food chain, how would you match them up? Which meal do you think comes from which food chain? Why do you think that?" • Collect these entrance tickets and explain to students that they will revisit them at the end of the unit to see if they still agree with the way they have matched them up. 	<ul style="list-style-type: none"> • Opening the lesson by asking students to share their homework makes students accountable for completing homework. It also gives you the opportunity to monitor which children have not been completing their homework. • Using entrance/exit tickets allows you to get a quick check for understanding of the learning target so that instruction can be adjusted or tailored to students' needs during the lesson or before the next lesson. Pairing entrance tickets with exit tickets allows both teachers and students to track progress from the beginning to the end of the lesson.
<p>B. Unpacking Learning Targets (2 minutes)</p> <ul style="list-style-type: none"> • Invite students to read the learning targets with you: <ul style="list-style-type: none"> * "I can find the gist of pages 22–25 of <i>The Omnivore's Dilemma</i>." * "I can read closely to answer questions about pages 22–25 of <i>The Omnivore's Dilemma</i>." • Ask students to Think-Pair-Share: <ul style="list-style-type: none"> * "We have read to find the <i>gist</i> many times before. When you read to find the gist, what are you doing?" • Listen for students to explain that they are reading to find out what the text is mostly about and to see how the text is structured. <ul style="list-style-type: none"> * "What is the purpose of reading closely to answer questions about a text?" • Listen for students to explain that it deepens their understanding of the meaning of the text. 	<ul style="list-style-type: none"> • Learning targets are a research-based strategy that helps all students, especially challenged learners. • Posting learning targets allows students to reference them throughout the lesson to check their understanding. The learning targets also provide a reminder to students and teachers about the intended learning behind a given lesson or activity. • Reviewing academic vocabulary words benefits all students developing academic language.

Work Time	Meeting Students' Needs
<p>A. Reading for Gist and Unfamiliar Vocabulary: Pages 22–25 of <i>The Omnivore's Dilemma</i> (15 minutes)</p> <ul style="list-style-type: none"> Focus students on the description of the industrial food chain on page 5. Invite students to read that food chain again, as that will be the focus of the next few lessons. Tell students they are going to read pages 22–25 of <i>The Omnivore's Dilemma</i> for the gist. Remind them that they should have already done a first read of these pages for homework. Display the Reading Closely: Guiding Questions handout. Explain that the questions on this document can help students to read texts closely because by questioning a text using these questions, it will help them to gain a deeper understanding of it. Tell students that in this lesson, they are going to look at the Questioning Texts row of the chart. Ask students to Think-Pair-Share: <ul style="list-style-type: none"> * “Which of these questions do you think will help guide our reading so we can get the gist of pages 22–25 of <i>The Omnivore's Dilemma</i>?” Listen out for and encourage students toward all the Topic, Information, and Ideas questions. (What is this text mainly about? What information or ideas does the text present? What details stand out to me as I read?) Highlight/check-mark those questions on the displayed copy of the document. Tell students that they are going to reread from the “I Plant Corn” section for the gist. Ask them to read along silently as you read the first paragraph aloud. As with other read-alouds, remember that the purpose is to read the text slowly, fluently, and without interruption. Don't stop to address comprehension or vocabulary issues, as these will be addressed later and stopping would interrupt the flow of the text. Ask students to Think-Pair-Share: <ul style="list-style-type: none"> * “What is the gist of this first paragraph? What is this paragraph mostly about?” Listen for them to explain that it is mostly about soybeans and how they are a big crop in the industrial food chain. Model annotating the paragraph on a sticky note and sticking it in the margin. Display and distribute the word-catcher. Tell students that where possible you would like them to read around unfamiliar words, looking for context clues to figure out what they mean; however, if they can't figure it out from the context, encourage them to use a dictionary. Model how to fill out the word-catcher using a dictionary with the word “processed,” paraphrasing the dictionary definition on the word-catcher. 	<ul style="list-style-type: none"> Hearing a complex text read slowly, fluently, and without interruption or explanation promotes fluency for students: They are hearing a strong reader read the text aloud with accuracy and expression, and are simultaneously looking at and thinking about the words on the printed page. Be sure to set clear expectations that students read along silently in their heads as you read the text aloud.

Work Time (continued)	Meeting Students' Needs
<ul style="list-style-type: none"> • Tell students that if they still aren't sure what the word means after looking for context clues and looking in the dictionary, they should leave the Definition column blank to be discussed with the whole group later. • Pair students up and invite them to work together to find the gist and record unfamiliar words on their word-catchers for the rest of the paragraphs up to the end of page 25. • Circulate and support students as they read. For those who need more support, ask them to practice telling you the gist of a section before they write it in the margin. • Invite students to pair up with a different student to compare what they wrote for their gist statements and to help each other with any unfamiliar vocabulary they haven't been able to figure out the meaning of. • Refocus the whole group and invite them to share any unfamiliar vocabulary words they found on pages 22–25 along with the definition. Where students were unable to work out the definition from the context or find it in a dictionary, encourage other students to assist them with the definition. Ensure that a student verifies that meaning in a dictionary. To keep things moving, if no one else knows what the word means, tell students what it means. • Be sure to address these words, as students may struggle with them: kernels, Pioneer Hi-Bred 34H31, agribusiness, hybrid, traits, disease-resistant, bushel, quadrupled, yields, genetically, organism, genes, DNA, bonanza, patent, corporation, reckless. • Remind students to record new words on their word-catcher. • Explain that many words we use today have Greek and Latin origins, either in the root of the word and/or in the affixes, and that becoming familiar with some of these can help us figure out the meaning of unfamiliar words. Ask students: <ul style="list-style-type: none"> * "What is an affix?" • Select volunteers to share their response with the whole group. Listen for students to explain that an affix is something added to the beginning or end of a word to change the meaning. Provide an example: The suffix "ant" means "a person who," so the word "applicant" means "a person who applies." • Focus students on the word <i>regular</i> on page 23. Explain that the "reg-" part of <i>regular</i> means straight. So when Michael Pollan says "regular kernels" on page 23, he means straight kernels or normal kernels, rather than something different or modified. 	<ul style="list-style-type: none"> • Reviewing academic vocabulary words benefits all students developing academic language. Consider allowing students to grapple with a complex text before explicit teaching of vocabulary. After students have read for the gist, they can identify challenging vocabulary for themselves. Teachers can address student-selected vocabulary as well as predetermined vocabulary upon subsequent encounters with the text. However, in some cases and with some students, pre-teaching selected vocabulary may be necessary. • Inviting students to say the gist aloud to a partner or the teacher before writing can give them the confidence to record their ideas and ensure they know what to write.

Work Time (continued)	Meeting Students' Needs
<ul style="list-style-type: none"> Focus students on the word <i>quadrupled</i> on page 24. Ask: <ul style="list-style-type: none"> * Can you spot the root of this word? What does it mean?" Cold call students for their responses. Listen for them to explain that the root is "quad-", which means four. 	
<p>B. Text-Dependent Questions: Pages 22–25 (12 minutes)</p> <ul style="list-style-type: none"> Tell students that now they are going to dig deeper into this section of the text to understand it fully. Distribute Text-Dependent Questions: Pages 22–25 of <i>The Omnivore's Dilemma</i>. Tell students they are going to work through the questions on this handout. Ask students to get into the triads they worked with in the previous lesson. Remind them of the Teammates Consult protocol from yesterday in which they spend time reading and discussing and coming to an agreement about an answer before they all pick up their pens to write. Make it clear that it is now the responsibility of the triad to manage this protocol—you will not be telling them when to discuss and when to pick up their pens. Model how to use details in the text by asking students to work through the first question with you. Refer to the answer on the Text-Dependent Questions: Pages 22–25 of <i>The Omnivore's Dilemma</i> (answers, for teacher reference). Circulate to assist students. Ask questions to encourage them to refer to the text: <ul style="list-style-type: none"> * "How did you come to that answer? Can you use a detail from the text to support your answer? Can you point out to that answer in the text?" Invite students to pair up with someone from another triad to discuss and compare their answers. Invite students to revise their answers if they think it is necessary based on what they see in the answers of the person they are working with. 	<ul style="list-style-type: none"> Text-dependent questions can be answered only by referring explicitly to the text being read. This encourages students to reread the text for further analysis and allows for a deeper understanding. Some students may benefit from having access to "hint cards," small slips of paper or index cards that they turn over for hints about how/where to find the answers to text-dependent questions. For example, a hint card might say, "Check back in the third paragraph on page 2." Use of protocols (like Teammates Consult) allows for total participation of students. It encourages critical thinking, collaboration, and social construction of knowledge. It also helps students to practice their speaking and listening skills.

Work Time (continued)	Meeting Students' Needs
	<ul style="list-style-type: none">Graphic organizers and recording forms engage students more actively and provide the necessary scaffolding that is especially critical for learners with lower levels of language proficiency and/or learning
<p>C. Introducing Food Chain Graphic Organizer (5 minutes)</p> <ul style="list-style-type: none">Display and distribute the Food Chain graphic organizer. Remind students that Michael Pollan calls these “food chains.” Give students 2 minutes to read through the descriptors for what they are to record in each link of the chain. Ask students to discuss in triads:<ul style="list-style-type: none">* “What do you think you are going to record in each link of the chain? Why?”Select volunteers to share their triad discussion with the whole group. Point to the first link on the displayed organizer, “Start.” Ask students to Think-Pair-Share:<ul style="list-style-type: none">* “So in this lesson, we have started to look at the industrial food chain. From what you have read so far, where do you think this food chain begins?”Listen for students to explain that it begins with corn seed, which the farmer buys from a seed company and then plants to grow.Model writing “Industrial” at the top of the handout and recording quick notes in the first link on the displayed Food Chain graphic organizer. Invite students to do the same. Tell students that they will continue filling this out as they read more about the industrial food chain.	<ul style="list-style-type: none">When reviewing the graphic organizers or recording forms, consider using a document camera to display the document for students who struggle with auditory processing.Providing models of expected work supports all students, especially challenged learners.

Closing and Assessment	Meeting Students' Needs
<p>A. Continue Filling Out Food Chain Graphic Organizer (5 minutes)</p> <ul style="list-style-type: none">• Invite students to work in their triads using the Teammates Consult protocol to continue filling out more links on their Food Chain graphic organizer. Make it clear that they still have a lot more to read about the industrial food chain, so they should not expect to finish the organizer until the beginning of Lesson 5.	
Homework	Meeting Students' Needs
<ul style="list-style-type: none">• Read Chapter 3 of <i>The Omnivore's Dilemma</i>. Continue filling out your Food Chain graphic organizer for the industrial food chain. Remember to record any new vocabulary on your word-catcher.

Guiding Questions 1		
I. Approaching the text Reading closely begins by considering my specific purposes for reading and important information about a text.	I am aware of my purpose(s) for reading: <ul style="list-style-type: none">• Why am I reading this text?• In my reading, should I focus on:• The content and information about the topic?• The structure and language of the text?• The author's view?	I take note of information about the text: <ul style="list-style-type: none">• Who is the author?• What is the title?• What type of text is it?• Who published the text?• When was the text published?

From Odell Education's "Reading Closely for Details: Guiding Questions" handout. Used by permission.

Reading Closely:
Guiding Questions Handout

Guiding Questions 1		
<p>II. Questioning Texts</p> <p>Reading closely involves:</p> <p>1) initially questioning a text to focus my attention on its structure, ideas, language, and perspective, then</p> <p>2) questioning further as I read to sharpen my focus on the specific details in the text</p>	<p>I begin my reading with questions to help me understand the text.</p> <p>Structure:</p> <ul style="list-style-type: none"> • How is the text organized? • How do the text's structure and features influence my reading? <p>Topic, Information, and Ideas:</p> <ul style="list-style-type: none"> • What is this text mainly about? • What information or ideas does the text present? • What details stand out to me as I read? <p>Language:</p> <ul style="list-style-type: none"> • What key words or phrases do I notice as I read? • What words or phrases are critical for my understanding of the text? • What words and phrases are repeated? <p>Perspective:</p> <ul style="list-style-type: none"> • What is the author thinking and saying about the topic or theme? • Who is the intended audience of the text? 	<p>I pose new questions while reading that help me deepen my understanding.</p> <p>Structure:</p> <ul style="list-style-type: none"> • Why has the author structured the sentences and paragraphs this way? <p>Topic, Information, and Ideas:</p> <ul style="list-style-type: none"> • What information/ideas are presented at the beginning of the text? • What information/ideas are described in detail? • What do I learn about the topic as I read? • How do the ideas relate to what I already know? <p>Language:</p> <ul style="list-style-type: none"> • What words and phrases are powerful or unique? • What do the author's words cause me to see or feel? • What words do I need to know to better understand the text?

Reading Closely:
Guiding Questions Handout

Guiding Questions 1		
III. Analyzing Details Reading closely involves thinking deeply about the details I have found through my questioning to determine their meaning, importance, and the ways they help develop ideas across a text.	I analyze the details I find through my questioning. Patterns across the text: What details, information, and ideas are repeated throughout the text? How do details, information, or ideas change across the text? Meaning of Language: Why has the author chosen specific words or phrases? Importance: Which details are most important to help me understand the text? Which sections are most challenging and require closer reading? Relationships among details: How are the details I find related in ways that build ideas and themes? What does the text leave uncertain or unstated? Why?	Analyzing and connecting details leads me to pose further text-based questions that cause me to reread more deeply.

Text-Dependent Questions

Pages 22–25 of *The Omnivore's Dilemma*

Name: _____

Date: _____

I can cite text-based evidence that provides the strongest support for my analysis of literary text.
(RI.8.1)

Questions	Notes
1. What reasons does Pollan give for his claim that corn “succeeded so well”?	
2. How did farmers like George Naylor’s grandfather get their seed?	
3. Why don’t they do that anymore?	
4. What is so great about these new hybrid seeds? How do they help the farmer?	
5. How is genetically modified corn seed created? Why is it better than the hybrid seed?	

Text-Dependent Questions

Pages 22–25 of *The Omnivore's Dilemma*

Questions	Notes
6. Why do farmers like George Naylor refuse to grow GMO crops?	
7. What do you think “GMOs are a reckless experiment with the natural order of things” means?	

Text-Dependent Questions

Pages 22–25 of *The Omnivore’s Dilemma* Answers for Teacher Reference

Questions	Notes
1. What reasons does Pollan give for his claim that corn “succeeded so well”?	<i>Because there are “dozens of varieties,” and it is easy for us to breed “new types of corn to fit our needs.”</i>
2. How did farmers like George Naylor’s grandfather get their seed?	<i>They grew it—they kept some of their crop to plant for next season.</i>
3. Why don’t they do that anymore?	<i>Seed companies came up with hybrid corn seeds that resist disease and produce a lot of corn, but the seeds the corn crop produces aren’t very good, so farmers have to buy new seeds from the seed company to plant every year.</i>
4. What is so great about these new hybrid seeds? How do they help the farmer?	<i>The hybrid seeds produce a lot more corn—four times as much corn as the non-hybrid seed. The hybrids also have thicker stalks and root systems, which makes them stand upright, making them easier to harvest with large machines.</i>
5. How is genetically modified corn seed created? Why is it better than the hybrid seed?	<i>It is created in a laboratory by adding genes, which don’t come from corn plants, to corn DNA. These seeds grow even more corn than the hybrid.</i>
6. Why do farmers like George Naylor refuse to grow GMO crops?	<i>Because they think GMO crops are “a reckless experiment with the natural order of things.”</i>
7. What do you think “GMOs are a reckless experiment with the natural order of things” means?	<i>It means that GMO crops are not natural and could go wrong in the future.</i>

Food Chain graphic organizer

Food Chain for _____

Additional Information

1. Inputs: What resources are used to grow the food (crops and animals)?

2. Growing (crops and animals):
Describe where the food grows. What does it look like? What happens to make the food grow? How is the food harvested?

3. After the Harvest:
Where does it go next?
How is it processed?

4. Transportation:
How is it moved from the farm to the factory or from the factory to the consumer?

5. Consumers:
What is the product they get? How does it impact them?

6. Unintended Outputs: Besides the actual food, what else is produced?
