Lesson 18 2•3

Lesson 18

Objective: Order numbers in different forms. (Optional.)

Suggested Lesson Structure

- Fluency Practice (12 minutes)
- Application Problem (8 minutes)Concept Development (30 minutes)
- Student Debrief (10 minutes)
- Total Time (60 minutes)

Fluency Practice (12 minutes)

Sprint: Sums–Crossing Ten 2.OA.2 (12 minutes)

Sprint: Sums-Crossing Ten (12 minutes)

Materials: (S) Sprint: Sums-Crossing Ten Sprint

This is the third day of our sums and differences intensive. Students heard you say yesterday's Sprint would be repeated today, and you're keeping your word. Start the session by asking them to remember how many problems they were able to finish the day before.

- T: That is your goal. Everyone's goal is different because we are not competing with each other but with...?
- S: Ourselves!
- T: Your personal best. That is what matters. Share with your partner at least one strategy you use for practicing your sums and differences.
- S: (Share.)
- T: Here we go. Take your mark, get set, think!

Application Problem (8 minutes)

For an art project, Daniel collected 15 fewer maple leaves than oak leaves. He collected 60 oak leaves. How many maple leaves did he collect?

After guiding the students through the RDW process, let them analyze some work.

Order numbers in different forms. 10/24/14

rcial-ShareAlike 3.0 Unported Lic

Here are some suggested questions based on the drawings to the right.

- a. How does the number sentence relate to the drawing?
- b. How does the first drawing relate to the second drawing?
- c. What did the student who drew the place value disks do to start the problem?
- d. Could the person who drew the number bonds also have started with making both the oak and maple leaves equal?
- e. Can you see that equality in both pictures?

Concept Development (30 minutes)

Concrete (6 minutes)

- Materials: (T) Unlabeled hundreds place value chart (Lesson 8 Template), place value disks (9 hundreds, tens and ones) (S) Unlabeled hundreds place value chart (Lesson 8 Template), place value disks (9 hundreds, tens and ones), personal white board
 - T: Slide the place value chart inside your personal white boards.
 - T: Partner A, show 2 hundreds 12 ones on your place value chart. Partner B, show 15 tens 4 ones.
 - T: (As students work, project your own place value chart and use place value disks to show 103.)
 - T: Compare numbers with your partner and me.
 - S: (Compare.)
 - T: What's the smallest, or least, number?
 - S: 103!
 - T: The greatest?
 - S: 212, or 2 hundreds 12 ones.
 - T: Write the three numbers from least to greatest on your personal white boards. Use standard form. At the signal, show your boards.
 - S: (Write 103, 154, 212.)
 - T: Good. Partner A, change to show 62 tens 4 ones. Partner B, change to show 4 ones 6 hundreds.
 - T: (As students work, show 642 on your place value chart.)
 - S: (Show.)
 - T: Now, compare. Write the numbers from least to greatest on your boards.
 - S: (Compare and show 604, 624, 642.)

Order numbers in different forms. 10/24/14 our boards.

NOTES ON MULTIPLE MEANS OF ENGAGEMENT:

As mentioned in Lesson 17, it is wise to provide visual support for struggling students. The teacher directives are coupled with the personal boards but are entirely oral. Write the directives as you say them so that students see the connections and build towards the chart.

Partner A	Partner B
2 hundreds 12 ones	15 tens 4 ones
212	154
62 tens 4 ones	4 ones 6 hundreds
624	604
5 + 300 + 30	50 + 3 + 300
335	353
30 tens + 7 tens	29 tens + 8 tens
37 tens	37 tens

Creative Commons Attribution

Creative Commons Attribution-NonCommercial-ShareAlike 3.0 Unported License

- T: Nice work. Partner A, change to show 5 + 300 + 30. Partner B, change to show 50 + 3 + 300.
- T: (As students work, write *five hundred thirty-three* in word form instead of using place value disks.)
- S: (Show.)
- T: Compare our numbers. This time write them from greatest to least on your boards.
- S: (Compare and show 533, 353, 335.)
- T: You paid careful attention to the order, switching to go from greatest to least!
- T: Partner A, change to show 30 tens + 7 tens. Partner B, change to show 29 tens + 8 tens.
- T: (As students work, write three hundred seventy in word form.)
- S: (Show.)
- T: Compare our numbers. Write them using the symbols <, >, or = to make a number sentence.
- S: (Compare and show 370 = 370 = 370.)

Pictorial (12 minutes)

Materials: (T): Pocket chart, 1 set of pre-cut <, >, = symbol cards (Lesson 15 Template 1) (S) Personal white board

Assign students to groups by counting off as A, B, C, and D.

- T: Write your letter on the back of your board so you don't forget it.
- S: (Quickly write their letters.)
- T: Think of a number and draw it on your place value chart in the way that you choose.
- T: Use hundreds, tens, and ones, or any combination of those you'd like. Take about one minute.
- S: (Think of numbers and draw them in a variety of ways.)
- T: A's, write your number in standard form below your drawing. B's, write numbers in unit form. C's, write them in word form, and D's, write them in expanded form.

NOTES ON MULTIPLE MEANS OF REPRESENTATION:

Lesson 18

Thinking of a number can be challenging for students below grade level. Provide some less intimidating ways to generate numbers:

- Digit cards
- Spinners
- Dice

Again, post the assignments with visual clues or examples, too.

<u>Form</u>	<u>Example</u>
A: Standard Form	24
B: Unit Form	4 ones 2 tens
C: Word Form	twenty-four
D: Expanded Form	20 + 4

Students are seated at the carpet.

- T: (Collect three boards. Place the numbers side by side in the pocket chart with space between them.)
- T: Work with your partner to order these three numbers from least to greatest on your personal white boards.
- S: (Order the numbers on their boards.)
- T: Let's read the numbers in order.
- S: (Read.)
- T: (Trade drawings for three new ones and continue with two or three drawings at a time until each has been used at least once.)

Order numbers in different forms. 10/24/14

Problem Set (12 minutes)

Students should do their personal best to complete the Problem Set within the allotted 12 minutes. For some classes, it may be appropriate to modify the assignment by specifying which problems they work on first. Some problems do not specify a method for solving. Students should solve these problems using the RDW approach used for Application Problems.

Instruct students to draw the values on the place value chart as directed on the Problem Set, then order from least to greatest or greatest to least in standard form. Write <, >, or =.

Student Debrief (10 minutes)

Lesson Objective: Order numbers in different forms.

The Student Debrief is intended to invite reflection and active processing of the total lesson experience.

Invite students to review their solutions for the Problem Set. They should check work by comparing answers with a partner before going over answers as a class. Look for misconceptions or misunderstandings that can be addressed in the Debrief. Guide students in a conversation to debrief the Problem Set and process the lesson.

- T: Bring your Problem Sets to our Debrief.
- T: Work with your partner to carefully check your answers.
- S: (Work for two minutes.)
- T: Look at your drawings on your place value charts. Think about how your pictures are alike or different. Tell your partner.
- S: I drew them just like the words say. They're all different. → I used hundreds, tens, and ones in all of mine. → I drew them all differently, but then I wrote the numbers in standard form. → I decided to only use tens and ones to show each number.
- T: Look again. What about your drawings makes the numbers easy or difficult to compare?

Order numbers in different forms. 10/24/14

S: It's hard to compare them when they all are in different forms. \rightarrow It's also really hard when the units are mixed up.

Lesson 18

- T: How might you use what you know about comparing to help you order numbers well?
- S: It helps to write all those different forms in the same way. Then, it's simple to put them in order.
- T: True! Head back to your seats for your Exit Ticket.

Exit Ticket (3 minutes)

After the Student Debrief, instruct students to complete the Exit Ticket. A review of their work will help you assess the students' understanding of the concepts that were presented in the lesson today and plan more effectively for future lessons. You may read the questions aloud to the students.

Α	Add.				# Correct
1	9 + 2 =	2	23	4 + 7 =	
2	9 + 3 =	2	24	4 + 8 =
